Introduction

The Global Concessional Financing Facility (GCFF) was established in July 2016 as part of the *New Financing Initiative to Support the Middle East and North Africa (MENA) Region* which aimed to provide additional financing on more favorable terms to countries in the MENA region impacted by forced displacement, conflict and economic instability. In September 2016, the GCFF was expanded to a global facility in order to provide middle income countries the development support needed to address refugee crises across the globe.

In October 2022, the GCFF Steering Committee agreed to re-configure the GCFF window structure by: (i) establishing regional windows for Latin America and East and Central Europe (ECE), (ii) renaming the existing Lebanon/Jordan window as the Middle East and North Africa (MENA) window, and (iii) retaining the Global window, Jordan window and Lebanon window. This new window structure was fully operational and effective on January 1, 2023.

This report covers the financial status of the GCFF Trust Fund. It is produced by the Trustee (World Bank) in accordance with the Trustee's role in the GCFF Operations Manual and Standard Provisions for the Contribution Agreements/Arrangements (Section 6):

"The Trustee will maintain separate records and ledger accounts with respect to the funds deposited in the Trust Fund and transfers made therefrom. The Trustee will report to the Steering Committee semi-annually on the financial status of the Trust Fund, including information on the status of Contributions, investment income, Allocations, Commitments, transfers and funds available for approval by the Steering Committee."

GCFE Trust Fund Financial Summary as of March 31, 2024

Pledges and Contributions:

A pledge represents a Supporting Country's expression of intent to make a contribution. Pledges are formalized as Contributions by way of a countersigned Contribution Agreement/Arrangement.

As of March 31, 2024, contributions to the GCFE Trust Fund totaled USDeq. 952.00 million which has been deposited as cash into the GCFE Trust Fund.

There are no outstanding pledges or contributions.

Investment Income:

As of March 31, 2024, the GCFE Trust Fund earned investment income of approximately USD 46.09 million on the liquid balances in the GCFE Trust Fund and investment income received from Implementation Support Agencies (ISA).

Funding Approvals:

As of March 31, 2024, the GCFE Steering Committee had approved funding from the GCFE Trust Fund totaling USD 962.33 million to cover Concessionality amounts and ISA Costs, as well as Administrative Budget of the GCFE Coordination Unit and Trustee.

Funds Held in Trust:

Funds Held in Trust¹ reflect contributions paid-in from Supporting Countries, plus investment income, less cash transfers. Funds Held in Trust as of March 31, 2024 amounted to USD 155.26 million.

Funds Available for GCFE Steering Committee Funding Decisions:

Funds available to support GCFE funding decisions amounted to USD 35.76 million as of March 31, 2024.

¹ Funds Held in Trust represents balance of cash, investments and unencashed promissory notes (if any) as of the reporting date.

3. Asset Mix and Investment Income

ASSET MIX

The undisbursed cash balance of the GCFE Trust Fund is maintained in a commingled investment portfolio (“Pool”) for all trust funds managed by the World Bank. Within this pool, GCFE Trust Fund funds are invested in a short term, high quality fixed income portfolio with an investment horizon of up to one year.

The investment objectives for the GCFE Trust Fund are to optimize investment returns subject to preserving capital and maintaining adequate liquidity to meet foreseeable cash flow needs, within a conservative risk management framework.²

The portfolio allocation by asset class has the largest allocations to money market instruments and government securities.

INVESTMENT RETURNS

Portfolio performance during the quarter was mixed and driven by the interest rate path dictated by the US Federal Reserve Bank. The quarter started with slight steepening of the US treasury curve, followed by a robust labor market report, and higher than expected inflation in February that pushed investor expectations for a March 2024 monetary policy easing by the US Fed further out in the year.

² World Bank defines the market risk measures and tolerances for Model Portfolios of 1-year or less investment horizon as 99% CVaR be no worse than -0.25%; and for Model Portfolios of longer than 1-year but less or equal to 5-year investment horizon as 99% CVaR be no worse than -1%.

Fed officials reiterated the “Higher for Longer” narrative for US interest rates as they need to see evidence of sustained improvement in inflation towards the target 2% before any monetary policy easing. This led to sharp repricing of interest rates across the yield curve in February. At the March FOMC, the Fed suggested that it is on path for 3 rate cuts in 2024 while reducing the number of rate cuts in 2025. This led to lower interest rate volatility with marginal decline in long term yields. The Portfolio positioning continues to be duration neutral.

The portfolio returns for the GCFE Trust Fund liquid portfolio (managed by the World Bank) or undisbursed cash balance³ during the first quarter of calendar year 2024 was 1.39%, non-annualized.

*non-annualized

ESG SUMMARY REPORT – GCFE INVESTMENT PORTFOLIO

As per the investment management strategy implemented by the World Bank, the funds held in trust benefit from the approach to Sustainable and Responsible Investment (SRI), which considers and incorporates Environmental, Social, and Governance (ESG) factors into Trustee’s investment processes. The implementation of ESG Integration falls within the purview of existing authorizations by the World Bank Board. Based on the endorsement by the World Bank management, starting from July 2019, the Trustee has applied ESG Integration as the default SRI approach for all portfolios managed by the World Bank, including for the GCFE Trust Fund assets.

Considering and incorporating ESG factors into investment processes should, all things being equal, lead to portfolios that have stronger ESG profiles compared to portfolios that do not explicitly consider these ESG issues. ESG Integration has become part of the existing investment processes and is intended to help fulfil the existing investment objectives. The application of ESG Integration as part of the investment process would not involve any changes in the current investment objectives or risk limits for the GCFE Trust Fund portfolio.

³ Excludes investment income received from ISAs totaling USD 26.78 million.

The GCOFF investment portfolio is primarily comprised of short-term high-grade fixed-income securities (sovereign, supranational and agency securities and bank deposits), and as of March 31, 2024, the portfolio has an ESG Quality Score* of 6.70 and an ESG Rating* of A. Based on its ESG positioning in the MSCI ESG Fund Ratings Universe (upper right of Figure 1), which is deemed to be the more consistent reference indicator, GCOFF’s investment portfolio falls in the second quartile of the ratings universe. This reflects average capability of GCOFF portfolio’s holdings in terms of managing key medium to long term risks and opportunities arising from Environmental, Social and Governance factors.

Figure 1: MSCI ESG Portfolio Summary – Global Concessional Financing Facility Trust Fund

* Note: ESG Quality Score is based on MSCI ESG Ratings and measured on a scale of 0 to 10 (worst to best) following a rule-based methodology. ESG Ratings Momentum represents the percentage of a portfolio’s market value coming from holdings that have had an ESG Ratings upgrade, and those with a downgrade, since their previous ESG Rating assessment. The ESG Quality Score is calculated as a weighted average of ESG scores of individual holdings adjusted by ESG Ratings Momentum and ESG laggards (if any). The weight applied to the individual ESG scores is determined by the portfolio weight of individual holdings as of the reporting date. Based on the above, the ESG Quality Score, which is subject to potential skewing effect from any factor in the calculation, could slightly vary between different reporting dates along with changes in individual holdings and their portfolio weights as well as changes in ESG Ratings Momentum. Please see details on MSCI ESG Ratings Methodology [here](#).
